

July 22, 2013

Dear Lisa,

HDR Engineering, Inc. (HDR) appreciates the opportunity to present the following proposal for communications and technology and administrative support for the US Highway 169 Corridor Coalition as a consultant with the strategic and effective facilitation, organization, and graphic capabilities.

1. Contact Information

HDR Engineering, Inc.
701 Xenia Avenue S, Suite 600
Minneapolis, MN 55416

Emily Hyland
Telephone: 763-278-5985
Email: Emily.Hyland@hdrinc.com

2. HDR Company Background

HDR is an architecture, engineering, planning and consulting firm that excels at helping clients manage complex projects and make sound decisions.

As an integrated firm, HDR provides a total spectrum of services for our clients. Our staff of professionals represents hundreds of disciplines. They partner on blended teams worldwide to provide solutions beyond the scope of traditional A/E/C firms.

HDR's operating philosophy is to be an expertise-driven firm that delivers tailored solutions through a strong local presence. HDR's ability to draw upon company-wide resources and expertise is a great strength in meeting and exceeding your expectations.

History and Size

- Founded in 1917
- More than 8,000 employee-owners
- More than 185 locations worldwide
- Full-service, multidisciplinary staff

Relevant Experience & Reference

MnDOT | I-35E Cayuga & Maryland Avenue Bridge Replacement | Saint Paul, Minnesota

Reference: Joey Lundquist, PE
MnDOT Project Manager
Email: Joey.Lundquist@state.mn.us
Phone: 651-234-7648

The I-35E (Cayuga) Project is located on I-35E between University Avenue and Maryland Avenue in Saint Paul, MN. The scope of this \$110M project includes reconstruction and realignment of I-35E including replacement of eleven bridges. The existing I-35E / Pennsylvania Avenue Interchange will be replaced by a new interchange at Cayuga Street. This new interchange will correct safety and operational issues that exist at

Pennsylvania Avenue and improve access for Saint Paul's recently constructed Phalen Boulevard corridor. Capacity will be added in each direction of I-35E and the existing roadway geometry will be improved.

HDR is leading a team of partners to conduct traffic forecasting and modeling for a possible managed lane within the project, completing both the preliminary and final road construction plans, and preliminary bridge plans for the project. HDR's Public Involvement team planned and managed three rounds of open house meetings to engage the community and provide design updates as the project progressed. HDR developed information boards, project handouts, graphics, meeting notification materials, talking points and meeting summaries to support Minnesota Department of Transportation's project team.

Minnesota Power | Great Northern Transmission Line | Minnesota

Reference: Jim Atkinson
Environmental Lead
Email: Jbatkinson@allete.com
Phone: 218-355-3561

Minnesota Power is proposing a 200-mile, 500 kV transmission line from the Canadian border to the Iron Range Substation, and a 70-mile, 345 kV double circuit transmission line from the Iron Range Substation to the existing Arrowhead Substation in Duluth, MN. This transmission line project will provide a robust, efficient regional solution to allow for the delivery of renewable energy within Minnesota Power's control area and to help address emerging transmission system needs in Northern

Wisconsin and Michigan's Upper Peninsula. HDR's initial tasks on the project include identifying a constructible route that minimizes impacts for each transmission line; assisting Minnesota Power in engaging the public, agencies, and other stakeholders on the routing and siting process, and the social, economic, and environmental issues associated with the planning, construction, and operation of the transmission lines; navigating the state and federal environmental processes necessary to obtain project approval; performing the necessary surveys for permits; and obtaining the required permits including a presidential permit from the Department of Energy.

HDR is leading the siting, environmental review, and public outreach components of the project. HDR established and is executing a public outreach strategy including the coordination, logistics, planning, meeting management, materials development, meeting notifications, and meeting summaries for over 40 stakeholder meetings to date. HDR develops and distributes a quarterly project newsletter, Great Northern News. A database of 40,000 stakeholders is managed using HDR's iREALM-CCM web-based database. HDR also designed and maintains the project website (www.greatnortherntransmissionline.com)

Montana-Dakota Utilities Co. and Otter Tail Power Company | BSSE Transmission Line | SD and ND

Reference: Cris Oehler
Director, Public Relations
Email: coehler@otpc.com
Phone: 218-739-8297

HDR prepared a high level route review on three different routes for Montana Dakota Utilities Company (MDU) and Otter Tail Power Company (OTP) on the Big Stone South to Ellendale 345 kV Transmission Line project. The proposed project is located in Dickey County, North Dakota and in the South Dakota counties of Brown, Clark, Codington, Day, Marshall, Roberts, and Grant. This route review identified potential

development constraints of the proposed project related to biological resources; archaeological, cultural, and historical resources; surface hydrological resources; land cover and land use/permitting. The proposed study area is 0.5 mile outside of the route corridor of the three proposed routes that were provided by MDU and OTP.

HDR is leading the siting, environmental review, and public outreach components of the project. HDR established and is executing a public outreach strategy including the coordination, logistics, planning, meeting management, materials development, meeting notifications and meeting summaries for over 20 stakeholder meetings to date. HDR develops and distributes a quarterly project newsletter, Power Delivered. A database of 8,000 stakeholders is managed using HDR's iREALM-CCM web-based database. HDR also designed and maintains the project website (www.greatnortherntransmissionline.com) and maintains the script and messages left on the toll-free project information line.

3. Specific Proposal for Services

Communications and Technology Services

Web Page

With experience developing, managing, and generating content for project websites, HDR has the background knowledge to efficiently work with Bufflehead, the Coalition's website provider, to coordinate updates, as needed. As meetings are coordinated, HDR will provide updates to the calendar and provide meeting logistics, agendas, final meeting minutes, and presentation documents to Bufflehead to update. In addition, HDR will review the website content monthly for additional content and information updates. HDR will work with the US Hwy 169 Corridor Coalition to identify updates for the Corridor News on a regular basis.

Membership Publications

To streamline the development of the quarterly newsletter, HDR's team will develop a newsletter outline for review. With an approved newsletter focus and in coordination with the Coalition, HDR will create content and design the newsletter. Following a final review of each newsletter with the Executive Committee, an electronic newsletter will be distributed and it will also be published and available on the Coalition website. A total of eight newsletters will be developed and published.

Social Media

A Facebook page and Twitter account will be established and maintained by HDR. An average of one post will be made weekly and additional posts will be made on an as needed basis to provide information or gather input from followers. As an optional task, not included in this scope, HDR can develop a social media protocol and monitoring programs to assist with the management of the Coalitions social media presence.

Administrative Services

As a member of the coalition, Khani Sahebjam remains on the Board and will continue attending the meetings. He will assist in strategizing new member recruitment, political and technical assistance, and help advance projects on the corridor.

Executive Meetings

For twenty-four (24) Executive Meetings held over the next two years, HDR will coordinate all meeting logistics and materials including reserving room location, room set-up, name tents, sign-in sheets and recording meeting minutes. HDR will draft and email agendas to attendees and verify Executive Board member's attendance. Meeting materials and meeting minutes will be developed according to the Executive Committee bylaws. HDR will coordinate with the Executive Committee to generate the agenda for the following Executive Committee Meeting and upcoming Board Meeting.

Board Meetings

For twelve (12) Board Meetings held over the next two years, HDR will coordinate all meeting logistics and materials including reserving room location, room set-up, name tents, sign-in sheets and recording meeting minutes. HDR will draft and email agendas to attendees and develop materials and meeting minutes according to the Executive Committee's bylaws. HDR will coordinate with the Executive Committee to develop a list of potential speakers and topics to use for upcoming Board meetings. With guidance from the Executive Committee, HDR will invite and confirm all meeting speakers and tours prior to each meeting. If tours are scheduled, HDR will organize all logistics.

Technical Committee

HDR will attend technical committee meetings on an as-needed basis. It is assumed that HDR will attend six (6) technical committee meetings over of the next two years.

Legislative Breakfast and Strategy Document

HDR's event planning skills will be leveraged as a Meeting Plan is developed to include all the organization components for the annual Legislative breakfast. HDR will select the venue, if the location is different than the League of Minnesota Cities building, and coordinate the catering, materials, presentations, registration, set-up, and tear-down, as required. In addition, HDR will design a user-friendly, 10-page, legislative strategy document. HDR will assist with two annual Legislative breakfast events.

General Administration Support

If requested, HDR can use a web-based contact and comment management database called iREALM-CCM to maintain, develop and update the mailing lists and website contact lists instead of updating contact spreadsheets. A password can be provided to members of the Coalition for access to iREALM-CCM. HDR will manage the contact lists using the tool format requested by the Coalition.

HDR will draft letters and other documents for approval and signatures based on input from the Executive Committee.

HDR will distribute the annual invoices and monthly financial statements electronically. These invoices and statements will be provided to HDR by the Financial Officer.

To welcome new members to the Coalition, HDR will mail a welcome letter, update the contact list with their information, update the Coalition letterhead, if needed, and add the individual's contact information to the website in coordination with Bufflehead.

Deliverables:

- Monthly website updates with meeting materials
- Monthly website review and updates
- Eight (8) electronic newsletters and outlines
- Weekly social media posts on Facebook and Twitter
- Meeting attendance and materials including:
 - Twenty-four (24) agendas, meeting minutes and meeting materials for each monthly Executive Committee Meeting
 - Twelve (12) agendas, meeting minutes, speaker/topic list and materials for each bi-monthly Board Meetings
- Attendance at six (6) Technical Committee meetings
- Two (2) Legislative Breakfast meeting plan and attendance
- Legislative Strategy Document
- Mailing list and contact list
- Ten (10) letters and documents developed for Executive Committee approval and signature
- Email distribution of annual invoices and monthly financial statements
- New member letter and updates

Assumptions:

- Bufflehead will provide a response within one-day to support the website updates
- The newsletters, agendas, meeting minutes, invoices and finalization statements, and meeting plans will all be provided electronically
- HDR will provide one weekly social media update on Facebook and Twitter
- The Coalition will provide HDR a mailing list and website contact list in spreadsheet format
- The Coalition will review and return materials with edits within one week of receipt.
- Up-to ten (10) new members will join the Coalition over the next two years
- HDR will assist with the planning of two annual legislative breakfast meetings
- One (1) legislative strategy document will be developed

4. Hourly Costs for Services

Hours Listed represent total hours for task completion over 2 years.

Task	Task Description	Project Manager (Emily Hyland)	Graphic Design (Kelly Spitzley)	Coordinator (Dana Petersen)	Admin. / Accounting	Total	Raw Labor
		\$35.00	\$26.00	\$20.00	\$28.00	Hours	Amount
1.0	Website Updates with Meeting Materials (1 hr/monthly)			24		24	\$480.00
2.0	Monthly Website Review (1 hr/monthly)			24		24	\$480.00
3.0	Quarterly Newsletters (8 hrs/newsletter)	8	40	16		64	\$1,640.00
4.0	Establish Social Media Platform (Facebook and Twitter)	1		6		7	\$155.00
5.0	Social Media Updates (1 hr/month)			24		24	\$480.00
5.0	Executive Meetings (8 hrs/meeting)	24		168		192	\$4,200.00
6.0	Board Meetings (8 hrs/meeting)	12		84		96	\$2,100.00
7.0	Technical Committee Meetings (3 hrs/meeting)			18		18	\$360.00
8.0	Legislative Breakfast Coordination (30 hrs/event)	8	4	48		60	\$1,344.00
9.0	Legislative Strategy Document	2	24	2		28	\$734.00
10.0	Mailing list and contact list management (1 hr/month)	2		24		26	\$550.00

11.0	Letters and documents developed for Executive Board (3-4 hrs/document)	5		30		35	\$775.00
12.0	Annual invoices and financial statements (1 hr/month)			24		24	\$480.00
13.0	New member welcome letter (2 hrs/member)			20		20	\$400.00
14.0	Project Management	12			14	26	\$812.00
Total Hours		74	68	512	14	668	\$14,990.00
Subtotal Raw Labor							
Subtotal Overhead		165.00%					
Subtotal Labor and Overhead							\$39,723.50
Profit		10.0%					\$3,972.35
Expenses							
Printing / Plotting / Reproduction							\$100.00
Mileage							\$226.00
400 miles (200 per year) at \$0.565/mile							
Subtotal Expenses							\$326.00
TOTAL ESTIMATED PROJECT COST							\$44,021.85

5. Reimbursement Costs

HDR anticipates 200 travel miles for meeting attendance and the legislative breakfast per year. Over the two years, 400 miles are anticipated for a total of \$226.00. HDR will only charge the actual miles required for reimbursement.

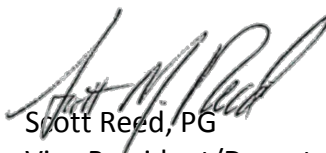

HDR is excited to provide the Coalition with communication, technical and administrative support. We hope to use our strategic communications and public involvement experience to assist the Coalition holding effective meetings and producing quality documents. Should you have any questions about our proposal, please feel free to contact Emily Hyland at 763.278.5985 or Emily.Hyland@hdrinc.com.

If you find this proposal to be acceptable, please sign below and return an executed copy to HDR as your notice to proceed.

Sincerely,

HDR Engineering, Inc.

Emily Hyland

Professional Experience

Ms. Emily Siedschlag is a Public Involvement Manager for HDR. With seven years experience in the consulting industry, the majority of Emily's experience has been developing and implementing statewide public involvement programs and public relations strategy. She has experience facilitating and managing public meetings, community workshops and coalition groups. She coordinates all planning, logistics, materials development, media management, comment management, and notification for a variety of outreach events.

HDR Project Experience

MnDOT, Cayuga and Maryland Avenue Bridge Replacement, St. Paul, MN. The I-35E Cayuga Project is named after the Cayuga Bridge, which carries I-35 traffic over Cayuga Street and the BNSF Railroad. The I-35E Cayuga Project includes reconstruction of I-35E between University Avenue and Maryland Avenue in St. Paul and replacement of the I-35E bridges over Cayuga Street, Pennsylvania Avenue and BNSF railroad tracks. HDR was retained to provide full engineering design services, as well as public outreach coordination, facilitation, and material development for the project. Emily led the public involvement effort, providing planning and facilitation for the public meetings as well as overall outreach strategy.

Minnesota Power, Great Northern Transmission Line, MN. HDR was selected to provide environmental and permitting support for construction of two new High Voltage Transmission Lines (HVTL); a HVTL between the Minnesota and Manitoba border and an Iron Range Substation and a 345kV HVTL between the Iron Range Substation and the Arrowhead Substation near Duluth, MN. HDR was commissioned to provide all public outreach for the project. As the public involvement manager, Emily developed a project-wide public involvement plan for the project. She managed and coordinated all stakeholder engagement including one round of 11 stakeholder workshops and two rounds of 11 and 14 open house meetings across the project area. She collaborates with the communication team at Minnesota Power while managing the project message, contact and comment database, media monitoring and outreach, website development and content management, project materials, notifications, and toll-free hotline.

Otter Tail Power Co. and Montana-Dakota Utilities, Big Stone South to Ellendale 345kV Transmission Line, SD, ND. HDR was been selected for a 345kV transmission line project from Ortonville, MN north to the Ellendale substation in North Dakota that is fulfilling and identified need for transmission by MISO. As the public involvement manager, Emily developed a project-wide public involvement plan for the project, managed and coordinated all stakeholder engagement including local leader meetings and two rounds open house meetings across the project area. She also manages the project message, contact and comment database, media monitoring and outreach, website development and content management, project materials, notifications, toll-free hotline and quarterly newsletter development and distribution.

National Park Service, Multi-Modal Alternative Transportation Plan for Mississippi National River and Recreation Area, MN. HDR, on behalf of the National Park Service, was retained to work with the Minnesota Department of Transportation, the Metropolitan Council, MRT Inc., and local partners to develop a multi-modal, alternative transportation plan for the Mississippi National River and Recreation Area (MISS). As a public involvement coordinator, Emily developed the public outreach recommendations for the MISS Plan, including outreach approach, tools, and a project survey system.

Kelly A. Spitzley

Graphic and Web Design Specialist

Education

Master of Library & Info Science,
Information Sciences & Systems,
College of Saint Catherine, 2012

Bachelor of Arts, English Language &
Literature, Saint Olaf College, 2004

HDR Tenure

4 Years

Industry Tenure

8 Years

Professional Experience

Ms. Kelly Spitzley provides graphic, multimedia, database, and web design for public involvement and strategic communications, project permitting and development, and construction efforts. She provides full design, layout, and content development services for print and web resources including public meeting informational materials, project websites, interactive web components, mapping, mailers, and advertisements. Kelly also provides services for technical research, database design, and technical writing support. She is adept at Adobe's Creative Suite, including InDesign, Photoshop, Illustrator, and Dreamweaver, is experienced at programming in Microsoft Access and Excel, developing Microsoft SharePoint sites, Google Maps API, Fusion Tables, and has experience with HTML, CSS, SQL, VBA for Access and Excel, and various content management systems.

HDR Project Experience

MnDOT, Cayuga and Maryland Avenue Bridge Replacement, St. Paul, MN. HDR was retained to provide full engineering design services for the reconstruction of I-35E between University Avenue and Maryland Avenue. HDR also provided public outreach coordination, meeting facilitation, promotion, and informational material development for the project. Kelly designed and produced the meeting materials, including informational boards, handouts, and promotional material.

Washington County Public Works and South Washington Watershed District (SWWD), CSAH 19-20-22 Geometric Layout, Cottage Grove, MN. HDR provided services from concept development through final design and construction for the reconfiguration of the existing intersections of CR 22 and CR20 with CSAH 19 in the City of Cottage Grove to support the long-term goals of SWWD. Kelly designed an informational folded booklet visually outlining the details and considerations of the project alternatives.

Iowa Department of Transportation, Lock and Dam Feasibility Study. HDR developed an in-depth study for the Iowa Department of Transportation analyzing the current state and possible future options for modernization of the Iowa Lock & Dam system on the upper Mississippi River. Kelly used the information and data in the technical report to develop a highly visual infographic handout intended to educate government officials with key conclusions and recommendations from the report.

CEATI International, Inc., HDR Dam Safety Training, U.S. and Canada. HDR developed a digital educational guide and eLearning system for dam safety programs at dams and levees throughout U.S. and Canada. The program includes a synthesis of currently available literature, an interactive course and testing system, and a visually-oriented printable guide for dam operator use. Kelly designed the educational guide document and developed instructive visual figures and diagrams for use in both the guide and eLearning program.

South Washington Watershed District, Central Draw Storage Facility Outlet and Workshops, Minneapolis, MN. Kelly assisted with the design and development of a workshop presentation for the Central Draw Outlet/Overflow project. She worked closely with the engineering team to create a clear, understandable, visually informative presentation.

Washington County Public Works and South Washington Watershed District (SWWD), CSAH 19-20-22 Geometric Layout, Cottage Grove, MN. HDR provided services from concept development through final design and construction for the reconfiguration of the existing intersections of CR 22 and CR20 with CSAH 19 in the City of Cottage Grove to support the long-term goals of SWWD. Kelly designed an informational folded booklet visually outlining the details and considerations of the project alternatives.

Dana L. Petersen

Stakeholder Outreach Coordinator

Education

Bachelor of Science in Business
Marketing, University of Minnesota,
2012
Curtis L. Carlson School of Management

Degree: Business Marketing
Second Major: Communication Studies
Minor: Political Science

HDR Tenure

2 Year

Industry Tenure

2 Year

Professional Experience

Ms. Dana Petersen is a Stakeholder Outreach Coordinator for HDR Engineering, Inc. She has experience coordinating public meetings, community workshops, and coalition groups. She coordinates all planning, logistics, materials development, media management, data and comment management, and notification for a variety of outreach events.

HDR Project Experience

Minnesota Power, Great Northern Transmission Line, MN. HDR was selected to provide environmental and permitting support for construction of two new High Voltage Transmission Lines (HVTL); a HVTL between the Minnesota and Manitoba border and an Iron Range Substation and a 345kV HVTL between the Iron Range Substation and the Arrowhead Substation near Duluth, MN. HDR was commissioned to provide all public outreach for the project. Dana is a member of the public involvement team and provides planning and logistics support for stakeholder workshops; public meetings; comment and data management; content development and review; as well as meeting management.

Otter Tail Power Co. and Montana-Dakota Utilities, Big Stone South to Ellendale 345kV Transmission Line, SD, ND. HDR was been selected for a 345kV transmission line project from Ortonville, MN north to the Ellendale substation in North Dakota that is fulfilling and identified need for transmission by MISO. Dana contributed to the development of two state permits: the North Dakota PSC permit and the South Dakota PUC permit, and mainly public involvement support. These efforts include data management of 8,000+ stakeholders and landowners; planning and managing two rounds of open house meetings held for the public prior to submittal of state permits; and content development and review.

IaDOT, Central Iowa Rest Area Feasibility Study, IA. HDR was sole sourced by the Iowa DOT to work on the Central Iowa Rest Area Feasibility Study through the EOC contract between Iowa DOT and HDR. This project investigated existing services provided to interstate travelers at rest areas in central Iowa. Dana worked to identify whether or not the existing services provided at the rest areas in central Iowa could be replaced by adjacent rest areas and businesses in the area should they be permanently closed. Dana managed an outreach team in order to gather data through on-site analysis and engagement.

MnDOT, Cayuga and Maryland Avenue Bridge Replacement, St. Paul, MN. The I-35E Cayuga Project is named after the Cayuga Bridge, which carries I-35 traffic over Cayuga Street and the BNSF Railroad. The I-35E Cayuga Project includes reconstruction of I-35E between University Avenue and Maryland Avenue in St. Paul and replacement of the I-35E bridges over Cayuga Street, Pennsylvania Avenue and BNSF railroad tracks. HDR was retained to provide full engineering design services, as well as public outreach coordination, facilitation, and material development for the project. Dana was a member of the public involvement team and provided planning and logistics support for the public meetings and well as meeting management.

Clean Line Energy Partners, Rock Island Clean Line HVDC Transmission Line, IA, IL, NE. HDR was retained to provide siting, permitting, and stakeholder outreach for the Rock Island Clean Line (Rock Island). As a public involvement coordinator for the project, Dana worked with the Clean Line Energy and her public involvement team to execute effective public outreach across two states. The project team has held over 300 grassroots meetings along with over 40 public open house meetings since spring 2011. Dana was responsible for meeting logistics, materials development and outreach organization.
