

US HWY 169

CORRIDOR COALITION

July 22, 2013

Proposal for Communications/Technology and Administrative Support Services

Ms. Lisa Schickedanz
Scott County Community Services Division
Physical Development
600 Country Trail East
Jordan, Minnesota 55352

July 22, 2013

SUBJECT: HIGHWAY 169 CORRIDOR COALITION PROPOSAL FOR COMMUNICATIONS/TECHNOLOGY AND ADMINISTRATIVE SUPPORT SERVICES

Dear Ms. Schickedanz and Members of the Selection Committee:

From Mankato to the Twin Cities, Highway 169 (US-169) is an important transportation corridor that plays a key role in moving goods and people across the region. A major freight route with connections to the Midwest's largest intermodal inland waterway grain facility (Ports of Savage), the highway also serves as a highly traveled corridor for commuter traffic to numerous regional growth centers located along US-169. Increased traffic has resulted in longer and more hazardous travel times, negatively affecting the corridor's ability to connect with other parts of the state, as well as national and international markets. In order for US-169 to remain a viable and efficient interregional corridor, safety and congestion issues must be addressed to enhance commuter and commercial traffic flow and economic development opportunities.

SRF Consulting Group, Inc. has assembled a talented and experienced team of professionals to provide the Highway 169 Corridor Coalition with communications/technology and administrative support services. As a full-service transportation consulting firm with more than 250 employees, SRF has the expertise and capacity to assist the Coalition with all the services listed in the RFP. Our collective strengths include:

- **An Experienced Team with Local Knowledge:** The SRF Team has worked with various coalitions and partnerships throughout the region to complete several similar projects. Our work has included coalition support/advocacy, intergovernmental cooperation, strategic project planning and implementation, stakeholder communication, state/federal relationships and grantsmanship. This experience, which includes the TH 169 Interregional Corridor Study, uniquely positions the SRF Team to advance the Coalition's goals.
- **Strong Team Leadership:** Project Manager **Brian Shorten** has more than 40 years of public/private transportation planning experience, and he is skilled at assisting multi-jurisdictional organizations achieve their goals. **Lance Bernard** will serve as the project's Lead Planner. Lance is an excellent writer and uses high-impact graphics and various media outlets to create compelling messages for our clients. Brian and Lance currently staff the Highway 52 Freeway Partnership project, a collaboration between Dakota, Goodhue, and Olmsted counties (in association with MnDOT) to advocate upgrading Highway 52 to a freeway design.
- **Responsive and Effective Staff:** Our project staff and managers effectively anticipate and address issues as they arise. Our team is very experienced in building strong, effective corridor coalitions that accomplish significant transportation achievements.

SRF appreciates the opportunity to submit our proposal. Our team can support the Coalition's current needs, as well as additional services in the future. If you have questions regarding our submission, please contact Brian Shorten at bshorten@srfconsulting.com or Lance Bernard at lbernard@srfconsulting.com. Both Brian and Lance can also be reached by phone at (763) 475-0010.

Sincerely,
SRF Consulting Group, Inc.

Brian Shorten
Principal

An Equal Opportunity Employer

The Right People, the Right Services

Since 1961, **SRF Consulting Group, Inc.** has offered comprehensive, integrated consulting services. Our professionals are knowledgeable and creative with skills in diverse disciplines and a strong commitment to innovation.

SRF's mission is to help clients create vibrant, livable communities and sustainable transportation systems.

Our values — innovation, service, quality, and collaboration — are the cornerstones of our corporate philosophy, our project management practices, and our relationship with every client.

Experience & Similar Work

SRF has extensive experience successfully supporting corridor coalitions through our various coordination, communication, and administrative support services. We are also experts in special federal and state funding. We understand the importance of developing broad-based support for high profile projects. The Highway 169 Corridor Coalition project is very similar to ongoing services that SRF provides the TH 55 Corridor Coalition and the Highway 52 Freeway Partnership. Both of these organizations have successfully operated for more than a decade and have achieved significant accomplishments for their constituencies. SRF has also provided periodic advocacy assistance to the I-35W Solutions Alliance, the 610 Coalition, Washington County, Benton County, Chisago County, and the City of Moorhead in their project development/promotion efforts.

Notable SRF projects similar or directly relevant to the US Highway 169 Corridor Coalition's efforts include:

1. **Highway 52 Freeway Partnership:** I-90 to I-494 (Dakota, Goodhue, and Olmsted counties) – Communications, administrative support, legislative liaison, and grantsmanship
2. **Highway 55 Corridor Coalition:** I-494 to Annandale (Hennepin and Wright counties) – Administrative support, communications, legislative liaison, grantsmanship, technical analysis, and membership services
3. **I-35W Solutions Alliance:** (Hennepin, Dakota, and Scott counties and seven cities) – Technical studies, project prioritization, mapping, and communications
4. **Mankato Area Transportation Planning Study 2003**
5. **TH 169 Interregional Corridor Study** – Access management and website design
6. **MnDOT SHIP and State Transportation Plan**
7. **MnDOT District 7 Freight Study**
8. **Numerous state and federal funding grant applications**

SRF provides communications and administrative services for the Highway 52 Freeway Partnership, which includes participants from three counties, two metropolitan planning organizations, eight cities, and 18 townships. SRF produces various marketing materials (e.g. mailers, brochures, e-blasts) to reinforce the Coalition's mission and communicate key messages to public, business, and government audiences.

The SRF Team

SRF's project team assembled for this engagement comprises some of the industry's most experienced and enthusiastic transportation engineers, planners, and graphic artists/communication specialists. Each member of our technical staff has served in city or county positions and understands how to achieve consensus among diverse multi-jurisdictional leaders. Most importantly, they have extensive experience assisting corridor coalitions reach their goals, as attested by our references (please refer to the previous section).

Each of our key team members will contribute their substantial skills and experiences to assist the Highway 169 Corridor Coalition by informing members, facilitating consensus, completing necessary technical assistance, and providing various communication/technology and administrative services, all necessary tasks to establish a strong, cohesive, and effective Coalition. SRF will complete all RFP assignments in a professional and timely manner.

Our team organizational chart graphically depicts each person's role relative to the RFP tasks:

Brian Shorten will serve as our Project Manager. With more than 40 years of public/private transportation planning experience, he is adept at assisting multi-jurisdictional organizations achieve their goals. Brian currently manages SRF's work on the Highway 52 Freeway Partnership, as well as our ongoing Moorhead state and federal funding assistance programs. Before joining SRF, Brian served as the Executive Director of the Fargo-Moorhead Council of Government for nearly two decades. In this capacity, he coordinated efforts among multiple city, county and special purpose governments and assisted in facilitating consensus among more than 80 elected leaders and 30 senior staff on critical transportation issues.

Dave Montebello, PE, and **Brad Larson, PE** will serve as Project Advisors. Together, they have more than 75 years of combined transportation experience in both the public and private sectors. Dave will provide strategic planning, quality control, and guidance for the overall project. Dave has a deep understanding of the 169 Corridor, and his wealth of corridor management experience includes leading the US 169 Interregional Corridor Study and the 2003 Mankato Area Transportation Planning Study (MATAPS). As a former Scott County Engineer, Brad understands the intricacies of the 169 Corridor. Brad currently leads our TH 55 Corridor Coalition efforts. Both Dave and Brad have an excellent understanding of the corridor needs and extensive relationships with key public/private corridor stakeholders.

Lance Bernard is a talented planner with 10 years of experience. Lance will serve as the Lead Planner for this project. Lance is an excellent writer and uses high-impact graphics to creatively communicate compelling messages for our clients. He is also very organized and skilled at maintaining and supporting various organizations with diverse interests. Lance has used and prepared various media outlets, including web pages, newsletters, and social media websites such as Facebook and Twitter to keep stakeholders engaged during the planning process. These skill sets have been instrumental for the Highway 55 Corridor Coalition and Highway 52 Freeway Partnership. **Kristina Nesse**, Transportation Planner, will assist Lance. She currently provides communication, technology, and administrative sources for our TH 55 and TH 52 coalition work.

Our team also includes **Cecilia Kozicky**, Graphic Artist, and **Erica Duffy Larsen**, Communications Specialist and In-House Editor. Both have been directly involved in preparing a full spectrum of persuasive and informative materials (news releases, newsletters, brochures, booklets, talking points, etc.) for our coalition clients. Each has the ability to clearly communicate key messages (data/information/findings) that are technically supported and easy to understand. Erica's family lives in Jordan, and she is very familiar with the US-169 Corridor.

Proposed Work Plan & Services

Project Understanding

US Highway 169 (US-169) is an important principal arterial and interregional corridor serving growing centers and urbanized areas. This route is a major freight corridor, linking highways and the Ports of Savage. US-169 serves several fast-growing communities such as Eden Prairie, Savage, Shakopee, Jordan, and Belle Plaine. Other greater Minnesota regional centers such as Mankato, St. Peter, and Le Sueur are primary development nodes along the corridor. Growth in many of these communities (30 to 50 percent over the last 10 years in some cases) has fueled significant traffic increases on the corridor. The volume increases in commuter and freight traffic, along with mounting safety and capacity issues, have prompted state, regional, and local agencies, as well as the private sector, to seek improvements to the corridor.

As part of the effort to improve the corridor, communities and affected agencies along the US-169 corridor signed a joint powers agreement to form the Highway 169 Corridor Coalition in Spring 2009. The Coalition's expressed mission is: "Working together to enhance safety, reduce congestion and maximize economic development along the US Highway 169 interregional corridor." Until now, the Coalition has been primarily managed and supported by staff from local government agencies; however, the Coalition is seeking consultant assistance (approximately 30 hours per month) to provide communications/technology/administrative support services to manage various Coalition activities.

Drawing on our extensive coalition experience and knowledge of the US-169 corridor, SRF's approach to advancing the Coalition's mission includes:

- Developing a broad understanding among key stakeholders and review agencies of the corridor needs, issues, and problems.
- Enhancing timely communications among members to strengthen their ability to advocate for corridor solutions.
- Maintaining a current database of members, spokespersons, and champions.
- Building and maintaining corridor project support and cooperation among local, state, and federal officials; government agencies; key private stakeholders; and the general public.
- Assisting corridor leaders persuasively communicate current and future needs along Highway 169, as well as Coalition achievements, to local leaders, federal and state legislators, agencies, jurisdictions and other stakeholders along the corridor.
- Providing top-notch technical capabilities and compelling marketing materials.

As prescribed by the RFP, SRF will work closely with Coalition leadership to provide the following services in a timely and professional manner:

Communications and Technology Services

Web Page

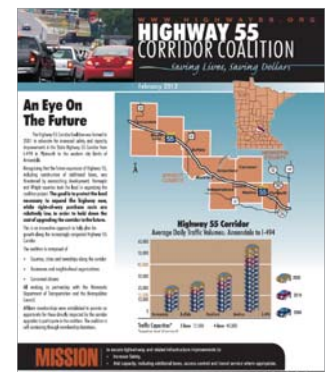

SRF will:

- Coordinate website updates with Bufflehead Web Design, the Coalition's web provider (The website platform is Unix/.php.) Our Lead Planner, **Lance Bernard**, works regularly with Bufflehead Web Design through his involvement with the American Planning Association of Minnesota (APA MN). Lance will work directly with Bufflehead to ensure timely updates to the website are made monthly.
- Provide updates to the calendar, meeting location/logistics, committee agendas, approved minutes, and presentations
- Update site with Corridor news (highway projects, economic development projects, etc.)

Membership Publications

SRF will:

- Create quarterly newsletter (graphics layout)
- Facilitate content for quarterly newsletter
- Review content with Executive Committee for approvals
- Publish quarterly newsletter
- Distribute quarterly newsletter (electronic distribution by email address)

In addition to providing content for the Highway 55 Corridor Coalition's website, SRF also created this newsletter.

Social Media

SRF will:

- Establish Facebook and Twitter accounts
- Provide regular updates to social media accounts (electronic distribution by email address)

In completing these communications and technology activities, SRF intends to enhance the Coalition's branding efforts, information sharing, communications, and inter-governmental cooperation.

Administration Services

Executive Meetings

SRF will:

- Coordinate meetings room/location logistics (assumes no room rental, as host will provide)
- Prepare draft agendas
- Email agendas, meeting minutes, and any other meeting materials to the Executive Committee per the bylaws (12 meeting per year held at home base)
- Verify attendance of the Executive Board members
- Attend meetings to set up room, including name tents and sign-in sheets, and take meeting minutes
- Work with Executive Committee to establish agenda for next Executive Committee meeting and upcoming Board meeting

Board Meetings

SRF will:

- Work with Executive Committee to develop a list of speakers/topics for upcoming Board meetings
- Invite and confirm speakers/tours
- Coordinate meeting room/location/speaker/tour logistics (assumes no room rental for meetings and no refreshments, as host will provide)
- Draft agendas
- Email agendas, meeting minutes and any other meeting materials to full Board per the bylaws (6 meetings per year, various corridor locations, assumes some meetings are same trip as Executive Committee meetings)
- Attend meetings to set up room, including name tents and sign-in sheets, and take meeting minutes

Technical Committee

SRF will:

- Attend meetings on an as-needed basis (assumes three meetings per year at home-base)

Legislative Strategy

SRF will:

- Set up and coordinate the logistics of the annual legislative breakfast expected to be held at the League of Minnesota Cities building at 145 University Avenue W, St. Paul, MN (assumes members' and legislators' meal costs are paid by Coalition)
- Develop a document (pamphlet) outlining the legislative strategy developed by the Board (estimate about 50 hard copy brochures for meeting)

General Administrative Support

SRF will provide general administrative support to the Coalition, including, but not limited to:

- Maintaining mailing lists and website contact lists
- Drafting letters and other documents for approval and signatures based on Executive Committee input
- Distributing annual invoices and monthly financial statements provided by financial officer
- Sending a welcome letter when a new member joins, updating contact lists, updating letterhead (if needed, and adding to website)

In completing these administrative services, SRF intends to bring consensus to diverse interests; foster an even more active and cohesive Coalition; inform members of important opportunities; and provide efficient and effective support in a timely fashion.

Estimated Hourly Costs

As requested in the RFP, please find below our estimated hourly costs (discounted) for this engagement. We have also noted our estimated reimbursement costs:

Estimated Hourly Costs		
% Involvement in 169 Coalition		Hourly Rate*
Lance Bernard	40%	\$70
Kristina Nesse	20%	\$57
Brian Shorten	15%	\$145
Erica Duffy Larsen	10%	\$60
Cecilia Kozicky	10%	\$80
Dave Montebello	2.5%	No Charge
Brad Larson	2.5%	\$115

*Note: Due to the importance of this project to SRF, we have discounted our typical hourly rates to those shown here.

We estimate our reimbursable costs to be primarily mileage to various meeting locations and a small amount for brochure publication (50 copies of a four-page color brochure). Our reimbursable cost estimate is \$750 annually.

As presented above, SRF has developed an approach that thoroughly addresses each of the work tasks outlined in the RFP, and we have assigned experienced and responsive staff who will deliver the needed services and quality products in a timely fashion.

The SRF Team is committed to applying our knowledge and expertise to advance the work of the Coalition. We appreciate the opportunity to submit our qualifications, and we look forward to working with the Highway 169 Corridor Coalition on this important endeavor.

Greetings from the Highway 52 Freeway Partnership! You are invited to attend the Highway 52 Freeway Partnership Public Meeting.

The Highway 52 Freeway Partnership invites all interested citizens to an important discussion on the future of the Highway 52 corridor between Rochester and the Twin Cities. The meeting will be held on:

Thursday, March 7, 2013
7:00 – 8:30 p.m.
Cannon Falls City Hall - City Council Chambers
918 River Road
Cannon Falls, MN 55902

Members and staff have been invited to discuss their outlook on the 2013 Legislative Session, transportation funding and the Highway 52 project. You will also hear about other ongoing TH 52 corridor studies through an update from each County Engineer.

We can accomplish great things. The Highway 52 Freeway Partnership looks forward to working with you. The Freeway Partnership looks forward to working with you!

Questions about this meeting or the Highway 52 Freeway Partnership in general can be directed to:

Washington County High Priority Projects

Two Projects, One Goal:

A multi-modal interconnected regional transportation corridor

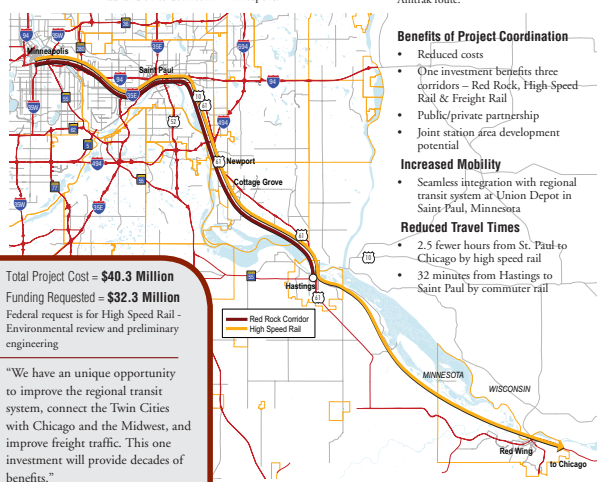

Red Rock Corridor Transitway

A 30-mile transportation corridor originating in Hastings traveling through the Union Depot in downtown Saint Paul and on to downtown Minneapolis.

Minnesota High Speed Rail Corridor

Connecting the major metropolitan areas of Saint Paul at the Union Depot with Chicago using the existing 126-mile Amtrak route.

Total Project Cost = **\$40.3 Million**
Funding Requested = **\$32.3 Million**
Federal request is for High Speed Rail - Environmental review and preliminary engineering

"We have a unique opportunity to improve the regional transit system, connect the Twin Cities with Chicago and the Midwest, and improve freight traffic. This one investment will provide decades of benefits."
- Myra Peterson, Washington County Commissioner

Benefits of Project Coordination

- Reduced costs
- One investment benefits three corridors - Red Rock, High Speed Rail & Freight Rail
- Public/private partnership
- Joint station area development potential

Increased Mobility

- Seamless integration with regional transit system at Union Depot in Saint Paul, Minnesota

Reduced Travel Times

- 2.5 fewer hours from St. Paul to Chicago by high speed rail
- 32 minutes from Hastings to Saint Paul by commuter rail

Red Rock and High Speed Rail at a Glance

3 for 1

One investment benefits three corridors — Red Rock, High Speed Rail & Freight Rail

2.5

Fewer hours from Saint Paul to Chicago by high speed rail

32

Minutes from Hastings to Saint Paul by commuter rail

WASHINGTON COUNTY *Building Vital Regional Connections*

WASHINGTON COUNTY Building Vital Regional Connections

September 2009

SEE WHAT'S INSIDE

High Priority Project Requests

- I-94 Corridor transit project will address growing congestion and enhances the economic vitality in the region.
- Broadway Avenue (CSA# 2) project improves connections to regional highway system, linking I-35 and US 61 and enhancing mobility within the communities.
- Red Rock Corridor Transitway connects Hastings through Saint Paul and Minneapolis to improve mobility and address growing congestion.
- Minnesota High Speed Rail Corridor connects the major metropolitan areas of Saint Paul at the Union Depot with Chicago using the existing Amtrak route.

651-430-4300

SRE CONNECTING GROUP, INC.

Washington County is committed to implementing several High Priority Projects that are crucial to building and maintaining economic vitality in the Upper Midwest by developing and connecting critical transportation/transit corridors. Federal authorization is essential to securing transportation funding for these future regional safety and mobility improvements.

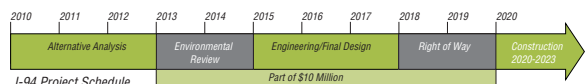

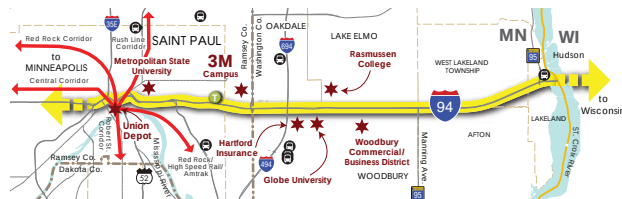

The I-94 Transition

From Saint Paul to the St. Croix River

Vision

The I-94 Corridor Transitway will provide increased mobility as well as access to safe and efficient travel for area populations and regional travelers. In addition, it will promote economic development and job growth and improve livability for the various communities along the corridor.

Total Project Cost = **\$10 Million**

Funding Requested = **\$8 Million**

Federal request is for Design, Environmental Review, Engineering, Final Design & R/W acquisition

What People Are Saying...

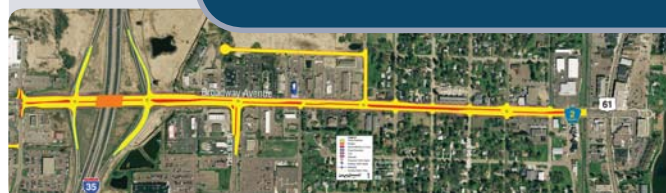

"Of all the transit corridors being studied for development in the metropolitan area, this one makes the most sense because you are going from downtown St. Paul to Wisconsin."

- Bill Pullrakab, Washington County Commissioner, I-94 Corridor Commission

"We're at a major crossroad at Interstates 94, 694 and 494. We need good access to all parts of the Twin Cities, whether it's transit or cars."

- Bill Hargis, Mayor, City of Woodbury, I-94 Corridor Commission Vice Chair

BROADWAY AVENUE IMPROVEMENT PROJECT

Project Background

Broadway Avenue is the main arterial that runs east-west through the heart of Forest Lake and serves as a primary connection to the regional transportation system. Traffic volumes, coupled with numerous access points along the corridor, have led to congestion and safety issues and the highest crash rate

for this type of roadway in Washington County. In addition to capacity and safety concerns, the infrastructure is deteriorating.

Project Goals

- Improve highway safety and mobility
- Improve pedestrian/bicyclist safety
- Relieve congestion on Broadway Avenue
- Maintain/improve access to businesses and residences

Broadway Avenue Project Schedule

Broadway Avenue at a Glance

50,000

Projected Average Daily Traffic

#1

Rank of crash rate for this type of roadway in Washington County

BENTON COUNTY MINNESOTA

US 10 to TH 23 Connection

Connecting Communities
Promoting Economic Growth
Working Together

...to ensure future levels of safety and mobility and to maintain a competitive edge

Sustaining Mobility in the St. Cloud Metropolitan Area . . .

Making Connections Across Communities

No east-west and north-south arterial route exists in western Benton County that can provide system connectivity, accommodate urban growth and enhance economic development opportunities for the St. Cloud metropolitan area.

The US 10 to TH 23 Connection will:

- Enhance mobility
- Improve safety
- Reduce congestion and neighborhood disruption
- Promote economic development
- Accommodate metropolitan growth
- Establish bicycle / pedestrian facilities
- Minimize public infrastructure cost
- Provide a truck route
- Fulfill local planning objectives

Promoting Planned Growth

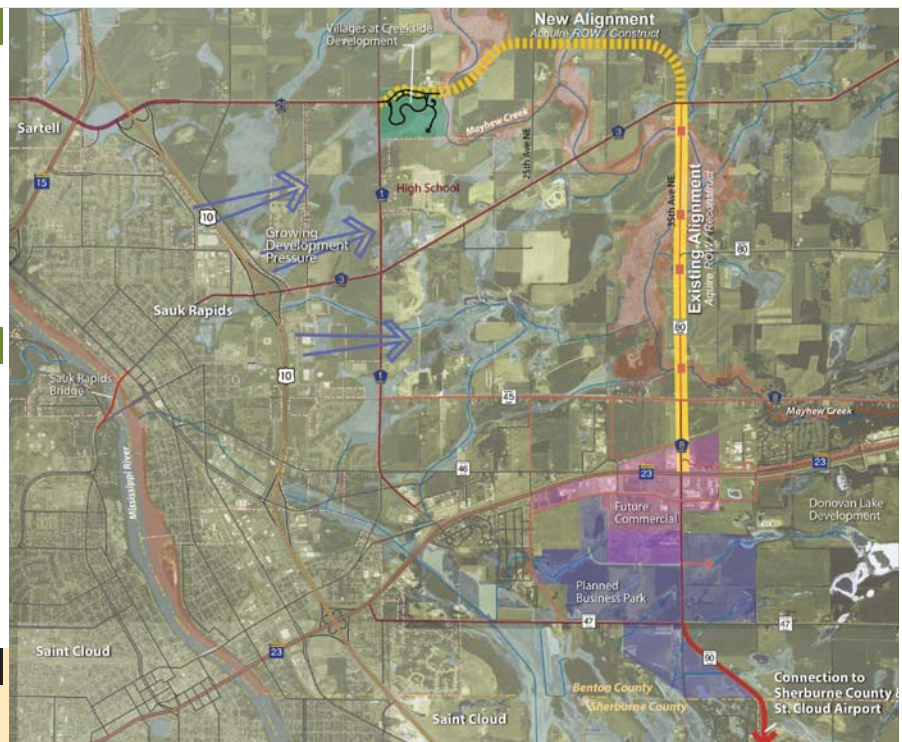

The US 10 to TH 23 Connection will provide a continuous roadway through western Benton County, linking metro growth centers with major residential, commercial, industrial and airport sites. The proposed roadway conforms to and serves urban growth plans approved at the city, county and regional levels. The Benton County corridor improvement program includes two phases:

- Phase I: Acquire the standard 120 feet of right of way (ROW) and construct the new east/west alignment of the corridor project, a 2.5 mile, two-lane rural section with provisions for bicycle/pedestrian facilities. The County has already bonded for funds to acquire the necessary ROW for both phases and will have possession of the phase I ROW within 100 days.
- Phase II: Acquire the additional ROW and reconstruct the remaining north/south corridor segment, designed as noted above.

2011 Federal Appropriations Request

For phase I of the project, Benton County is requesting \$3.0 million in federal funds to construct the new alignment segment from CSAH 1 to CSAH 3 (see map). These funds will be matched by \$0.75 million in County contributions for a total funding package of \$3.75 million.

The APO representing all governments in the St. Cloud metropolitan area has selected Benton County's US 10 to TH 23 Connection as the top priority project for 2011 congressional appropriations.

- Phase I: New Alignment
- Phase II: Existing Alignment
- Culverts or Bridges
