RE: Request for Proposals for Communications/Technology & Administrative Support Services

Dear Ms. Schickedanz:

Thank you for the opportunity to provide this proposal for Communications/Technology and Administrative Support Services for the US Highway 169 Corridor Coalition. As a High Priority Interregional Corridor, US-169 is critically important to the region and state for moving people and goods. Much progress has been made over the past several years, including the notable recent completion of the I-494/US-169 interchange reconstruction project, but much work remains. We would welcome the opportunity to contribute towards that continued progress.

It is our goal to not only provide the services requested in the proposal, but also to utilize our extensive legislative, funding, and design experience to assist the 169 Corridor Coalition in bringing a greater awareness of the corridor to state and federal legislature. **In short, if selected for this role, our staff would strive to not only provide all of the requested services but also to become active participants by helping the coalition “sell” the corridor.**

Our project Manager will be **Marc Briese**. While working for MnDOT, Marc was the 2013 Legislative Liaison in addition to being the MnDOT East Area Manager. He has extensive knowledge of the challenges facing transportation corridors as well as extensive connections to legislative policy makers which could be invaluable to the coalition to bring awareness to US-169.

Marc will be assisted by **Luke Porter**. In addition to having extensive graphic and web design experience Luke has an MBA with a marketing emphasis and has provided communication, graphic, and web services on numerous transportation projects and corridors in Minnesota. Luke will be the team's communication and Graphic Specialist.

In addition to Marc and Luke, our team brings familiarity with the 169 corridor. Numerous other Stonebrooke staff members have participated in projects along the corridor. **Doug Haeder** was the Mankato District State Aid Engineer as well as an assistant District Engineer responsible for planning. He was the founding Chair of the ATP (Area Transportation Partnership) and was responsible for planning as well as coordination efforts with local agencies along the 169 corridor. He has extensive knowledge and experience in MnDOT project development and funding processes. Tim Arvidson was the US-169/TH 19 interchange design project manager, and Chad Seaman participated in the development of preliminary design layouts in Jordan and Belle Plaine.

US 169 CORRIDOR COALITION

We have provided project management, web site administration, event planning, and administrative support services for numerous clients in Minnesota. In addition, our firm is preapproved with MnDOT to provide **Research Marketing, Event Coordination, and Public Outreach & Research Data Information.**

We believe we can provide an exceptional value to the Coalition because we have a detailed knowledge and understanding of the transportation project development process, including planning, research, and funding assistance. In addition to providing technology and administrative services to the Coalition, we offer the knowledge, experience, and lessons learned on over **\$200M** worth of transportation projects.

Our team was specifically chosen for this project based on past work history, experience and knowledge of the corridor development process, and even more importantly for their individual commitment to providing the highest quality of service available in our industry.

We look forward to this exciting opportunity.

Sincerely,

Tim Arvidson, PE
Vice President, Stonebrooke Engineering, Inc.

Key Staff

Marc Brieese, PE

Role: Project Manager

Marc has over 15 years of experience in traffic and transportation engineering. He has a Master of Science in Infrastructure Systems Engineering and a Bachelor of Science in Civil Engineering from the University of Minnesota, where he graduated with Honors, Cum Laude.

Prior to joining Stonebrooke, Marc was a Principal Engineer and the East Area Engineer (representing Washington and Chisago Counties) for MnDOT. Most recently Marc served as the **MnDOT Legislative Liaison** for the 2013 session, and served as the City of Woodbury Transportation Engineer. Some of his notable experience includes serving as the Traffic Engineer for the I-494 Design Build Project and the Project Manager for the MN 95 partnership projects in North Branch and US 61 mill and overlay, signals, and safety project, from MN 96 to MN 97.

Luke Porter, MBA

Role: Communications/ Technology Specialist

Luke has over 11 years of experience in web site design and administration (including Unix), graphics design, event planning, print production, and administrative services.

He also has 6 years experience in social media and project management. Luke completed his MBA degree with a Marketing Emphasis in 2007 which has given him additional experience in market research, creative consulting, and branding.

US 169 CORRIDOR COALITION

Luke's project highlights include:

- + Luke led the development of a new web site for the Minnesota County Engineers Association (MCEA). This new web site (which is Unix/.php based) includes many modern features, such as an interactive calendar with subscription options, comprehensive file management tools, a shared database between the main site and the private MCEA forum, and a content management system (CMS) for members to be able to update the site easily and efficiently. This site can be viewed at: <http://mncountyengineers.org/>
- + Luke is currently providing communication services on the CSAH 50 at CSAH 60 Intersection Reconstruction Project for Dakota County, including event planning, communication products (mailers, brochures, exhibits, etc.), and a project web site at <http://www.50and60.com>.
- + Luke served as the public communications coordinator on the TH 55 Design Build Project. In this role, he planned business owner meetings, public open houses, and local agency meetings. Luke reviewed communication responses, wrote press releases, created web site updates, provided weekly and monthly communication summaries, and developed the Public Information Plan. The communication products that Luke developed included flyers, meeting invitations, pedestrian crossing diagrams, location maps, and a detailed communication matrix.

Luke provided design and communication services on numerous county state aid, trunk highway, municipal state aid, federal aid, and design build roadway projects for public agencies.

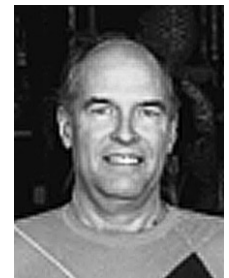

These projects include:

- + TH 30 Design Build Project (Dodge & Olmsted County)
- + CSAH 50 at CSAH 60 Intersection Reconstruction Project (Lakeville)
- + TH 55 Design Build Project (Rockford to Plymouth)
- + Hiawatha Avenue Pedestrian Experience Improvements (Minneapolis)
- + CSAH 22 Corridor Reconstruction (Washington County)
- + CSAH 68 at 91 (Scott County)
- + TH 19 / 11th Avenue (New Prague)
- + CSAH 153 (Lowry Avenue) Corridor Reconstruction (Hennepin County)
- + TH 19 Corridor (New Prague)

As leader of Stonebrooke Engineering's graphic design and web design services, Luke plays an integral role in the firm's ability to communicate with its clients and to the public.

Doug Haeder, PE **Role: Senior Engineer /** **Funding Specialist**

Prior to joining Stonebrooke Doug spent 21 years as an Assistant District Engineer and District State Aid Engineer for MnDOT. Prior to working for MnDOT Doug was the Pipestone County Engineer for 8 years. These positions involved managing, directing and administering multi-million dollar state aid and federal aid road and bridge construction and maintenance programs.

US 169 CORRIDOR COALITION

Some of Doug's extensive transportation experience includes:

- + Managed \$40,000,000 annual program of state aid and federal aid to 13 counties and 8 cities in MnDOT District 7.
- + Reviewed and approved state aid and federal aid construction plans and environmental documents.
- + Lead district program development through area transportation partnership process, involving state local, regional transportation partners.
- + Participated in nine member District Management Team to lead the MnDOT district.

Detailed Work Plan

Task 1: Project Management

Project Manager **Marc Briese, PE** will work in partnership with the TH 169 Corridor Coalition to ensure the most responsible, efficient, and economically feasible solutions are achieved. He will be responsible for ensuring that our services are completed on time, within budget, and in accordance with all applicable requirements.

Task 2: Communications/Technology Services

The Communications/Technology Specialist for this project will be **Luke Porter, MBA**. Luke will be responsible for updating the Coalition web site, including events, meeting details, agendas, minutes, and corridor news. Updates will be coordinated with Bufflehead, and all work will be completed on the Unix/.php platform.

Luke has managed numerous web sites for various organizations in Minnesota, and he follows the nationally recognized W3C standards for web site design, security, and accessibility. He is well versed in the latest studies by The Nielson

Company and others regarding **how people read and process information on the Web and on mobile devices.**

Luke will create the graphic layouts for the Coalition quarterly newsletters. After submitting each newsletter for approval, Luke will publish and distribute it to the subscriber base. Luke has been responsible for similar services for other agencies, including construction newsletters for the CSAH 153 (Lowry Avenue) Corridor Reconstruction, the TH 55 Design Build Project, and many others.

Luke will establish Facebook and Twitter accounts for the Coalition, and will provide regular updates to these accounts. Luke will also make **recommendations for other popular social media outlets**, and can provide information on the advantages and potential audience of each outlet. Luke currently manages the Facebook and Twitter accounts for 6 different companies, and is familiar with the latest **promotional options, performance methods, and best practices.**

Task 3: Administrative Services

From assisting with and leading technical seminars, symposiums, and technical committees to administering public forums and social outings, we have participated in events ranging from small lunch meetings to full day catered multi-faceted seminars.

Stonebrooke Engineering staff members Marc Briese and Luke Porter will attend Coalition Executive and Board Meetings. Marc will attend these meetings at no cost to the coalition and will contribute as desired and appropriate. This may include providing input on developing and implementing **legislative initiatives** and providing assistance on seeking and applying for **project funding** at local, state, and federal levels.

US 169 CORRIDOR COALITION

For the Coalition's Executive and Board Meetings, services will include:

- + Coordinate meeting location details
- + Prepare and distribute agendas
- + Submit meeting minutes and materials
- + Establish the agenda for future meetings
- + Verify attendance
- + Coordinate speakers and tours
- + Work with the Executive Committee to develop a list of speakers/topics
- + Invite and confirm speakers/tours
- + Take care of all necessary logistics
- + Providing input as appropriate

Marc and Luke will set up and coordinate the logistics of the annual Legislative Breakfast. They will develop communication materials which outline the legislative strategy developed by the Board. Information can be presented in a range of formats, including text, illustrations, renderings, and diagrams.

Luke and/or Marc will attend Technical Committee Meetings on an as-needed basis and will provide general administrative support services to the Coalition, such as:

- + Maintaining mailing lists and contact lists
- + Drafting letters and other documents for approvals and signatures
- + Distributing annual invoices and monthly financial statements
- + Welcoming new members and updating materials accordingly

With Marc's legislative background and Luke's communication experience, we can provide **marketing guidance** utilizing graphics and web-based materials that ensures the 169 corridor is a primary focus of state and federal representatives as well as to the travelshed community.

It is our goal that with the extensive transportation background of our team, our familiarity with corridor issues, legislative processes, and funding sources our team will be an invaluable resource ensuring that the **US 169 Corridor Coalition's voice is heard.**

Fee Structure

Stonebrooke Engineering will provide professional services to the US Highway 169 Corridor Coalition on an hourly basis for project specific tasks not to exceed a maximum contract amount at the rates listed below.

Staff Member	Hourly Rate
Marc Briesse, PE Project Manager	\$146.00*
Doug Haeder, PE Senior Engineer / Funding Specialist	\$100.00
Luke Porter, MBA Communications / Technology Specialist	\$70.20

* Marc Briesse will attend Coalition Board Meetings and Executive Meetings at **no charge**.

Mileage: at the IRS Reimbursable Rate, using the Scott County Courthouse as "home base" for off-site meetings. Mileage to on-site meetings will not be billed.

Reimbursable Expenses: Stonebrooke will provide printing services at **no charge** for Coalition meetings, including color copies, tri-fold brochures, posters, maps, roll plots, and foam board mounting.
