The Minnesota Transportation Alliance

Originally organized back in 1893, the Minnesota Transportation Alliance is a statewide coalition of organizations advocating for a safe and effective transportation system that works for all Minnesotans. Our Alliance includes local governments, businesses, labor, the transportation industry, transit systems, rail, waterways, and airports. In short, our members are on the front lines, planning, designing, building and operating Minnesota's transportation system every day.

The Alliance has been a leading force in campaigns to increase funding for transportation investments. The Alliance co-chaired the campaign to pass a constitutional amendment dedicating all of the revenue from the motor vehicle sales tax to highways and transit in 2006. Following that campaign, Progress In Motion – an arm of the Alliance – was established to lead the public relations effort aimed at building support for a comprehensive, statewide transportation funding package. That package was passed in 2008, dramatically increasing funding for highway and transit investments.

The Minnesota Transportation Alliance continues to maintain a close working relationship with legislators on both the state and federal levels. The Alliance hosts the annual Transportation Day at the Capitol and Washington, D.C. Fly-In events that bring our members together with decision makers. We have a strong reputation for presenting solid information and for bringing diverse coalitions together in support of a common agenda.

Our experience in transportation includes providing communications and administrative support for a number of corridor coalitions and other groups. In the past, the Transportation Alliance worked with the Highway 55 Coalition, the Highway 7 Task Force, and we continue to maintain contracts with the Southwest Corridor Transportation Coalition (advocating for improvements to highways 212 and 5) and the Minnesota Public Transit Association.

Our team of staff has the experience and skills to provide assistance in a number of areas for our clients including communications work, accounting, administrative assistance and continual updates on action by lawmakers at both the state and federal levels.

Proposal For Services

Communications and Technology Services

The Minnesota Transportation Alliance will bring a team of staff with experience and skills in:

- ❖ **Web Page Maintenance** – our team members have experience in updating and maintaining web sites for the Transportation Alliance, the Southwest Corridor Transportation Coalition and the Minnesota Public Transit Association. We have experience in using a number of programs and platforms for these sites.
- ❖ **Social Media** – the Alliance maintains Facebook and Twitter accounts as well as our YouTube channel and presence on Linked In. We have added new staff who bring a fresh new perspective to our work in building a social media following.
- ❖ **Membership Publications** – our team has the graphic skills to work with the leadership of the Highway 169 Corridor Coalition to create a quarterly newsletter and ensure timely publication and distribution of this newsletter.

Administrative Services

The Minnesota Transportation Alliance has many years of experience in working with Corridor Coalitions. We will bring that experience to this work to ensure accurate and timely:

Meeting Set Up – Coordinating location, agenda content, agenda distribution, verification of attendance, room set-up, confirmation of speakers, and other duties.

Meeting Attendance – Attending meetings and assisting with room set up and distribution of materials as well as taking meeting minutes.

Legislative Strategy – Assisting with the annual legislative breakfast. We will bring our knowledge of the legislative process and experience to assist in developing materials that communicate the goals of the Highway 169 Corridor Coalition.

General Administrative Support – Providing accurate mailing lists and contacts, distributing information to members, including new members and ensuring the timely maintenance of all records and the web site.

Services for the Highway 169 Corridor Coalition

The Minnesota Transportation Alliance is growing. With more team members, we have the capacity to bring more attention to the Highway 169 Corridor Coalition while also providing the experience from our work with other groups.

Recently added staff will bring experience in graphics software including In Design, Publisher, and Adobe Acrobat, as well as the programs in Microsoft Office. We have the know-how to develop and expand your social media presence and to assist in ensuring a professional look to all materials developed and distributed by the Coalition.

Our team also has experience with ARC GIS software in developing highway corridor maps and other documents. We will provide assistance in developing materials that are tailored to the Highway 169 Corridor.

The Minnesota Transportation Alliance will bring a wealth of knowledge in the area of highway planning and the political environment for transportation funding. We can provide a “bigger picture” context for the work of the Highway 169 Corridor Coalition.

Reimbursement Costs

The Transportation Alliance maintains an office one block from the State Capitol in St. Paul. We have the office equipment, hardware and software necessary to provide the services requested by the Coalition.

The Alliance has generally entered into contracts for a monthly fee plus expenses. With a 30-hour per month agreement, we would propose a monthly fee of \$1200 plus expenses.

Primary Staff time - \$22 per hour

Executive Staff time - \$50 per hour

Mileage – standard IRS rate

Copying – 10 cents per copy

Postage – US postal service rate

Materials – At cost with prior consultation of the coalition

The Transportation Alliance agrees to defend, indemnify and hold harmless the Coalition, its elected and appointed officials, employees, attorney, agents and representatives from and against any and all claims, costs, expenses, demands, actions or causes of action, including reasonable attorney fees and other costs and expenses of litigation which may be asserted against or incurred by the Coalition related to or arising from the services provided by the Alliance, except those that arise solely from the negligence, willful misconduct, or other fault of the Coalition and its members.

The Transportation Alliance will provide an Insurance Certificate evidencing that the insurance requested is in force.

Bringing Knowledge and Relationships Built Over Decades

The Minnesota Transportation Alliance brings many years of work within the transportation community and a strong reputation for research, knowledge and relationships. The Alliance collaborates with the Minnesota Department of Transportation on events and projects and has worked closely with many people at the Department. We also have a partnership with the Metropolitan Council as we advocate for increased revenue for both highways and transit.

During the 2013 Legislative Session, the Alliance was involved in the drafting of the new Corridors of Commerce program which was funded with \$300 million in trunk highway bonds. We maintain strong relationships with legislators on the House and Senate Transportation Committees.

With our successful work with other corridor coalitions, our success at the legislature in St. Paul and our leadership in bringing people from all across Minnesota to Washington, D.C., we understand how coalitions work and how to build stronger coalitions in pursuit of specific goals.

The Minnesota Transportation Alliance has developed strong messages and public relations campaigns around transportation funding and we can bring that knowledge to our work with the Highway 169 Corridor Coalition.

Our team is ready to provide excellent communication and administrative services. We pledge to provide accurate, timely information and to go above and beyond when needed to advocate for the Coalition.
