

35WSolutions.com: Proposal for web site project

April 17, 2012

This document is to serve as Bufflehead Web Design's proposal for the web for 35W Solutions. The information for this proposal was outlined during a meeting with John Quincy on April 13, 2012. The goal of this project is to develop a professional 7-10 page web site for www.35WSolutions.com. This project includes the following:

Work Items

- + Development and design of a new web site from John Quincy and others in the 35W Solutions working group. Integration of online email tool for group communications.
- + Use of existing logo as starting point for the project. Content for the pages of the site to come from the 35W Solutions working group.
- + Goal is to have the print material and web site done by mid-May 2012, after May 3rd working group meeting and input.
- + Content Management System (CMS) tools implemented on the sections of the web site that the 35W Solutions group would like to update and maintain on their own.

Technical Notes

There is 1 main technical note for this proposal.

1. Web site hosting. Once the domain name(s) have been secured, hosting will be setup in a Linux/Unix environment with mySQL database accessibility. The site can be moved to a new dedicated or virtual server at a later date, if the site traffic warrants more resources.

On-Site/Off-Site Work

It is proposed that the majority of the work for this project be done off-site. Eric Schmid and Dorothy Toth of Bufflehead Web Design will attend phone based work sessions and on-site work sessions as needed.

Project Timeline*

Project start date: to be determined

Project setup, development and testing: 20 total working days after the start of the project.

*Project timeline is an estimate and may change as the project progresses, as needed.

Project Costs and Payment

The costs for the web site re-design projects are outlined in the table below. The table **does not** include the follow items:

- (1) Any site features or web design work not outlined above for the web site, or listed in the table below.

All work outlined in the table below is billed at Bufflehead Web Design's hourly rate of \$55/hour. Any work not identified in the table below, but that is subsequently added before the start of or during the project, would be added to the table below at the \$55/hour rate.

After the initial web site project is completed, on going site maintenance/web development work would be billed at the \$55/hour rate.

Payments to be made on the following schedule:

1. Payment requested within 30 days of the date of invoice. Payment accepted includes check or credit card. Invoice to be issued at the completion of the web site development project.
2. Domain hosting to be paid quarterly.

Table 1: Description of Work – 35W Solutions		TOTAL
Web Site Design: Design and development of a 7-10 page web site; populate the site with content (text and pictures) provided by the 35W Solutions working group [7 hours x \$55/hr]		\$385

Populate site with content from 35W Solutions group: estimate 8 pages initially at 45 min per page [6 hours x \$55/hr]	\$330
Mapping Feature: setup of a database of projects that connects to the Google Maps API for displaying locations and information on the projects [7.5 hours x \$55/hr]	\$412
Web Based Email tool: web based email tool that will allow for communication between 35W Solutions working group [2.5 hours x \$55/hr]	\$137
Web Site Hosting: web site and mySQL database hosting; invoiced quarterly	\$17.95/mo
Total Cost: \$1,264	

Other Items

1. This agreement can be canceled with a 30 day notice by either party.

AGREEMENT

This constitutes the complete and final agreement between Bufflehead Web Design and 35W Solutions. All prior agreements not contained herein are without effect. This agreement may be modified only in writing executed by all parties hereto.
