~45K Students & faculty served.

1 M Employees served.

Access to Southern Minnesota

RECENT US-169 SUCCESSES

I-494/US 169 INTERCHANGE RECONSTRUCTION

This primary bottleneck in the southwest metro resulted in higher than average crash and severity rates and significant daily motorist delay.

The coalition relentlessly advocated the need to prioritize this critical improvement project and as a result the project was elevated as a major transportation improvement with dedicated funding.

Completed: 2012

US 169 ST. PETER PROJECT

The reconstruction of US 169 through Saint Peter, a \$16.6 million endeavor, was awarded nationally as the Best Recover Act - Small Project. The Minnesota DOT partnered closely with the City of Saint Peter to develop plans to reconstruct the historic portion of US 169 and Minnesota Ave in Saint Peter.

With the downtown business district designated as a Commercial Historic District by the National Register of Historic Places, the project entailed unique challenges, which the two agencies together surmounted to create a project that would renew the city while respecting its unique history and protected status.

Completed: 2009
